OOE: 121016L

The contraband is hidden on the island behind or under a light colored rock (or coral) outcropping. Hiding the contraband on the other side is a clump of thick heavy vegetation, some of which was placed there by the smugglers. In front of the outcropping is a sea grape tree. Further to the front is the water (about 20 yards). The contraband is in a rectangular, dark colored (dark green, brown or black) container with slightly rounded sides. Its dimensions are approx. 3 by 3 by 1.5 feet. On the notional grid the coords are 1 3/4 (see sketch). The terrain in the immediate area is basically flat, but walking is difficult and bumpy. Area is white, gritty, sharp coral with lots of low scrub vegetation (nothing higher than a sea grape tree). Much of the vegetation is thorny or grabby (catch and keep bushes). No palm trees.

A hand-drawn map showing a coastline. A dashed line runs diagonally across the page, representing a boundary or a path. A circle is drawn on the right side, containing the letters 'M' and 'U'. The word 'ANEGADA' is written in capital letters along the coastline on the left side of the dashed line. The word 'PASSAGE' is written in capital letters along the coastline on the right side of the dashed line.

Summary of Information.

Contraband was hidden on island behind/under a light colored rock (coral) outcrop. Hiding the contraband on the other side is a clump of heavy, thick vegetation some of which was placed there by smugglers (may be dried out/brown by now). In front of the Rock/outcrop is a sea grape tree. Further to the front (20+ yds) is water. The contraband is in a rectangular, dark colored (dark green, dark brown or black) container with ^{slightly} rounded sides. Its dimensions (approx) are 3 ft x 3 ft x 1.5 ft.

On THE NOTIONAL grid contraband is located AT I 3/4. For an aerial view of immediate area see sketch.

The terrain in the immediate area is basically flat, but walking is difficult/bumpy. Area is white, gritty, sharp coral with lots of low scrub vegetation (nothing higher than a sea grape tree). Much of the vegetation is thorny/grabby ("catchin' keep"). No palm trees.

spit of land

The drugs are hidden on the northeast side of the island behind rock outcropping. They were covered with bushes on the other side. There was a sea grape tree in front of the place and about 20 yards further is the water. The drugs were in a black, rectangular container, about 3 by 3 by 1.5 feet. There was a lot of scrub vegetation in the area, but no palm trees.
